

## Carpool Lane Area

Procedure for Afternoon Carpool:

There will be 4 lanes of cars on the gravel area. Lane 1 will be at the fence line next to the playground. Lanes 2 through 4 will follow so that the last lane, lane 4 will be at the Major Parkway fence.

Cars will enter the school grounds at the new entrance at the far end of the elementary playground and form lane 1. After lane 1 is filled, cars will then create lane 2 by moving all the way up. Lanes 3 and 4 are formed in the same way.

When it is time to move into the main parking lot, cars in only lane 1 will proceed to the loading area. Then, lanes 2-4 will follow. Out of courtesy, those arriving late should be polite and wait for all the lanes to clear before proceeding to the loading area. It is suggested that late arrivals should get in last lane, or allow those early arrivals to move with the lane they are in rather than cut ahead of them.
